

Products

Adveq offers private equity fund of funds management and related advisory services with a focus on those private equity segments it considers most attractive globally, based on its in-depth top-down and bottom-up analysis. Adveq's institutional clients benefit from the firm's state-of-the-art investment analytics and rigorous processes which have enabled the firm to build superior quality private equity portfolios and invest successfully through the different stages of economic cycles.

Investment philosophy

- Programs designed for stability and return enhancement
- Consistent, proactive interaction with fund managers
- Best practice fund manager selection based on global benchmarking

ESG compliant investment process

Adveq actively incorporates ESG into its investment analysis and decision-making processes and promotes acceptance and implementation of these principles within the private equity industry. Adveq's team will scrutinize an underlying fund manager's ability to implement and further develop mechanisms to ensure responsible behavior with regard to environmental, social and governance issues, both at the fund manager level and at the underlying portfolio company level.

ISAE 3402 (fka SAS 70) compliant core processes

The controls related to Adveq's investment management, fund administration and information technology practices are compliant with ISAE 3402 Type 2 (fka SAS 70 Type II), an internationally recognized assurance on controls reporting. > **More**
